

**2" PREFILTER  
CLIP FOR  
SINGLE OR DOUBLE  
HEADER FINAL  
FILTERS**

*Tri-Met HPC holds a two-inch Tri-Pleat pleated filter to our Tri-Cell ASHRAE Box filter (above). Below is a close-up of the Tri-Met HPC attached to a box filter and holding a prefilter pleat.*

The TRI-MET HPC™ Prefilter Clip is specifically designed to hold a two-inch prefilter on the face of a single or double-header box filter while being held in a TRI-MET TML™ or TRI-MET™ TM8 Holding Frame.

The TRI-MET HPC™ Clip offers a great advantage for installations that lack the space or convenience of a prefilter bank and use higher efficiency filters that require prefiltration.

The TRI-MET HPC™ Clip attaches directly to the header of a high efficiency box filter, like Tri-Dim's TRI-CELL™ ASHRAE, and allows a prefilter to be inserted on the face of the box filter. The TRI-MET HPC™ Clip is constructed of a durable metal to provide a sturdy fastener for years to come.

Tri-Dim recommends the use of four TRI-MET HPC™ Clips per filter to securely hold the prefilter in place and minimize air bypass.
