

Indoor Air Quality Program

At IET, we bring together the science of clean with unmatched experience and service. That's why building operators and facility managers turn to IET for comprehensive, proven IAQ programs. Featuring precise analysis. Expert service. Plus the right resources and expertise to deliver clean with 100% confidence—and minimal disruption of on-going operations. Clean that ensures continuous, efficient production of the highest quality.

Assessment & Testing

- ▲ Air sampling for bio-aerosol fungi and bacteria
- ▲ Environmental sampling for volatile organic compounds, particulates and CO₂
- ▲ Water, surface and bulk testing
- ▲ Evaluation of airflow/ventilation rates, temperature, relative humidity and more
- ▲ Ventilation system performance analysis to industry standards
- ▲ Carpet testing
- ▲ Gas phase testing
- ▲ Particle count analysis
- ▲ Fire damper inspection

Ventilation System Cleaning & Hygiene

- ▲ Air handling unit reconditioning
- ▲ Reconditioning and replacement of ventilation system components
- ▲ Microbial remediation
- ▲ Duct cleaning and liner replacement
- ▲ Particulate and debris removal from system components
- ▲ Drain pan refurbishment
- ▲ Protective coating application

Post-Project Sampling & Verification

- ▲ IAQ, water and surface sampling
- ▲ Contaminant retesting as needed
- ▲ Independent lab analysis
- ▲ Photographic and video documentation
